

# Color certificate

## DECLARATION OF CONFORMITY

Our Swiss Color® pigments comply with the requirements of ResAP (2008)1, the regulation of 21/12/2012 and the new pharmaceutical regulation from 04/2013 concerning nickel. Swiss Color® follows the Ordinance of the EDI on objects for the mucosa, skin and hair contact (Ordinance on objects for human contact, HKV, SR 817.023.41) Version: May 1, 2017 and ResAP (2008) 1. Furthermore, each pigment raw material is tested for possible impurities in independent accredited test laboratories. We guarantee that all our Swiss Color® pigments are made from high-purity raw materials, mixed and dispersed under vacuum and sterilized with gamma rays. Our pigments do not contain any preservatives in order to exclude and avoid allergy carriers.

Swiss Color® pigments are free from: iron oxides, dangerous AZO dyes, PAH = polycyclic aromatic hydrocarbons, forbidden heavy metals, dangerous aromatic amines including NDELA = Nitrosodiethanolamine.
